

Assets • Jobs • Workforce

Loc8 is field service, asset management, quoting and invoicing software for Phone, Android, Mac and PC. Easily manage and grow your business in the cloud.

Give your customers, and your team, something to smile about!

TAKE CONTROL OF YOUR BUSINESS

Whether you own or manage assets, you need an effective asset maintenance tool that gives you total control and visibility of your asset estate.

Alternatively, if you are a service provider or a sub-contractor you want a powerful yet easy-to-use mobile job management & maintenance control tool, perhaps with a customer help desk feature for managing your reactive maintenance calls.

WELCOME TO LOC8

Our configurable and feature-rich platform, Loc8, is a unique solution that seamlessly combines asset management, planned and reactive maintenance with field service management, delivered online and through our intuitive mobile applications.

Confidently used by businesses large and small around the globe, Loc8 is renowned for its easy integration with a wide range of other third party platforms, saving our users valuable time and expense by automating many business processes.

FEATURE RICH, CLOUD DELIVERED

Loc8 is packed full of user-friendly features, and can be deployed on-site or through our secure cloud platform.

Our customers love the way that Loc8 provides them the ability to manage asset and work at an operational level, while at the same time being able to spot strategic trends and changes for greater management control and reporting.

Using Loc8 ultimately means simplicity, reliability and efficiency for your asset, maintenance and field service operations.

LOC8 DELIVERS:

- Total asset management
- Preventive maintenance
- Work order management & despatch
- Site, job and technician mapping
- Smartphone applications for in-field workers
- Inventory management
- Business rules automation
- Quoting ... and much more!

“ Absolutely brilliant! Hi-end software to suit any challenging environment you can possibly imagine. Provides transparency to multidisciplinary teams at multiple locations, enables efficient collaboration. Implementation is swift and professionally guided by Loc8 Project managers. Highly recommended. ”

*Brendan Turgiev, Equipment & Logistics Controller,
LifeFlight Group Qld.*

FIELD SERVICE

Loc8 mobile is a highly configurable real-time, in-field auditing and maintenance tool providing up-to-the minute visibility and reporting of internal and subcontractor activity.

MAINTENANCE

Loc8 gives asset owners and service providers total control over the full spectrum of asset maintenance tasks, from reactive calls to value-added preventive work.

ASSETS

Effective field service is underpinned by powerful asset management, so we built Loc8 from the ground up as an asset-centric platform.

MOBILE

Smartphone access and exceptional service go hand-in-hand. That's why Loc8's beautiful mobile apps are available on a wide range of platforms, including Apple's iOS and Google's Android.

MAPS & LOCATION

Viewing a job's location & selecting the right technician is a hallmark of efficient field service. Loc8 delivers with its intuitive, easy-to-use location tools designed for service management.

SERVICE SUPPLY CHAIN

With Loc8, asset owners, service providers and sub-contractors have a seamless real-time platform for maintenance and service delivery. We call this the Loc8 Service Supply Chain.

CLOUD

24/7/365 access through Loc8's secure cloud platform. Pay-as-you-go, get up and running quickly, and never have to worry about hardware or IT resources.

INVENTORY

The Loc8 inventory management feature enables materials used in the field to be easily recorded, helping businesses to closely monitor and control jobs' profit margins.

INTEGRATION

Being a highly configurable platform, Loc8 has a proven ability to be integrated with most popular third party providers' systems, meaning that data silos are a thing of the past!

Assets • Jobs • Workforce

Compared with other service contracts of similar size and scope, Loc8 has empowered Programmed to consistently save money, improve process and deliver better customer service..
